Glass series by FRONT

FRONT Sofia Lagerkvist, Charlotte von der Lancken and Anna Lindgren form the Swedish design trio, FRONT. They are all educated industrial designers at Konstfack in Stockholm. FRONT loves to create design that teases the senses and tricks the eye into believing you are seeing something, which actually is not there. Just like the new glass series Frost for Stelton - it gives you the impression you are about to drink an irresistible cold drink. Enjoy!

Frost

Elegant new hand-blown glass series inspired by the Scandinavian climate. The series captures the beauty of ice crystals that form on windows on a clear and frosty winter day.

The partially frosted glass exudes cool elegance and is a clear Nordic signature on the series, which consists of an ice bucket, water carafe and glasses in two different sizes.

Soft storage

Use soft storage for all the bits and pieces you wish to keep in one place. No more running around looking for your comb, brush and hair bands – just stick them in your

soft storage in the bathroom. And why not keep your children's small toys together in a colourful soft storage bag. An easy way to organize your bits and bobs.

A new way to hold on to your mug

Circle

Mug by Francis Cayouette

Circle mug from Stelton has a stylish handle which forms a smart circle. This enables you to hold the mug as usual, but it also provides a good grip if you enjoy warming your hands on the mug. Circle mug is simple design with a twist.

Choose the same colour as your EM77 vacuum jug or combine a colourama for your table.

Tangle

Mesmerizing metallic magic

Let the glow of copper shine in your home with its metallic magic – and hint of nostalgia. The vase has a decorative copper band that wraps around the glass in an unpredictable and stylish pattern. Impressive and dynamic from every angle, the copper band gives the vase an ever-changing look. Tangle adds an element of luxury to your home, as the copper band adorning the glass sparkles with quality, style and grace.
