BRUS

Sparkling elegance for the kitchen

The BRUS carbonator frees the environment from large amounts of unnecessary plastic and transport when you make sparkling water or soda in reusable bottles at home.

The carbonator embodies the cylindrical shapes that are classic to Stelton's designs in the ultra-slim body and top. Intuitively turn the knob clockwise to adjust the amount of carbonation, and counter-clockwise to release excess gas. The carbonator comes with a BRUS bottle.

BRUS carbonator is compatible with standard threaded 425 g / 60 L cartridges of food grade CO₂, thread size M18 x 1.5.

The colours; Steel, Black Metallic, and Dark Brown Metallic perfectly match the current kitchen trends.
