

STELTON SPRING / SUMMER 2023

## Simplicity at its best

Turning a space into a home is all about the details and finding special objects that reflect your personality. Stelton works with international designers to create long-lasting, functional essentials for your home. Aesthetically sustainable designs that will serve and enhance both your daily life and festive occasions, now and in future.

Welcome to our spring collection.

# Brus is sparkling elegance for the kitchen

The minimalistic and slim Brus carbonator saves the environment from large amounts of unnecessary plastic and transport when you make sparkling water or soda in reusable bottles at home. The design draws on the cylindrical shapes that are classic to Stelton designs.

Brus is the sound of bubbling and freshly made sparkling water right in your own kitchen. The colours; Steel, Black Metallic, and Dark Brown Metallic perfectly match the current kitchen trends.

A sophisticated aura

The simple, beautiful glass products in the Pilastro series – the carafe, wine cooler, drinking glasses and bowls – already adorn many homes and now the series is expanding to include a cocktail shaker, long drink glasses and large drinking glasses.

Pilastro has a sophisticated aura inspired by the elegant idiom of Art Deco. Despite its elegant appearance, the entire Pilastro series is extremely durable and robust, allowing it to cope easily with everyday handling and the dishwasher.

# An inviting table

With its characteristic organic shape, Emma makes everyday life beautiful.

The natural look of the sand-coloured Emma vacuum jugs and water kettle complement any table setting. Known for clean lines and innovative material combinations, Emma is a modern design classic.

Enjoy the carefully crafted beech handle and the combination of materials defined by the designers HolmbäckNordentoft.

This spring, the Emma bread box and toaster come in a new colour, Sand, that matches the vacuum jugs and water kettle in the same bright style.

The Emma toaster is joined by a foldable warming rack that can be placed on top of the toaster. The warming rack makes it easy to heat croissants, buns, baguettes and other baked goods with shapes that do not fit into the toaster itself.

# Hurricane

Timeless design, inside and out.

This spring, the stylish Stelton Hurricanes will be available in a new colour, light grey. The discreet yet distinctive design boasts a timeless look suitable for anywhere in the home, both indoors and outdoors.

# A perfect cup of coffee

The Nohr series gives you the tools to experiment your way to your perfect cup of coffee.

The Nohr series includes a gooseneck kettle, a serving jug, a pour-over coffee dripper and a cold brew filter. The serving jug is the continuous element that fits both the pour-over and the cold brew filter.

Cold brew coffee is made with cold water and produces a softer, more intense taste without acid and bitterness – perfect for refreshing iced coffees in summer.

# One fits all

There is nothing like the aroma of freshly brewed coffee, and with the new practical universal coffee dripper from Stelton, it is easy to brew coffee directly in one of Stelton's many vacuum jugs – from the classic EM77 vacuum jug to the popular Emma and Amphora vacuum jugs.

A universal coffee dripper teamed with your favourite vacuum jug and electric kettle will make a great alternative to electric coffee makers that take up space on the countertop.

This spring, Stelton is relaunching the simple and elegant Wave cheese plane.

## The perfect match

The new Stelton mug makes it possible to style an on-trend coffee break with a mug and vacuum jug in a matching colour, or you can mix and match mugs and jugs in different colours for a more playful look.

# Bring on the spring

This spring, the classic EM77 vacuum jug is being launched in three new colours; Soft Sand, Soft Ice Blue and Soft Moss. The colours are all inspired by nature. The light shades help to create a sense of calm in the home, allowing us to relax and recharge.

This summer Stelton will launch a limited edition of the world-renowned EM77 vacuum jug in the new colour Poppy Yellow, to accent the softer shades that otherwise prevail in contemporary interior design.

Spice up your day with the To Go Click vacuum insulated cup in Poppy Yellow and enjoy your favourite drinks on the go.

To Go cups

To Go Click cup 0.4 l.  
keeps your drink hot for 4 hours  
or chilled for 8 hours.

To Go Click cup 0.2 l.  
keeps your drink hot for 2 hours  
or chilled for 4 hours.

With the To Go Click cup, you can also avoid spontaneous purchases of coffee in disposable cups. Instead, you can take your own coffee, tea or favourite drink with you or buy a refill for your own cup, saving the environment from unnecessary disposable packaging.
