The Collar collection

Italian design duo Daniel Debiassi and Federico Sandri created the Collar collection especially for all coffee aficionados.

The classic Italian stovetop espresso maker, also known as a “moka pot”, is the ultimate tool for making a professional, full-bodied brew at home. The Collar collection has a beautiful silhouette with a touch of Scandinavian design aesthetics.

“The combination of brass and black-coated metal makes the Collar shaker a ‘personal’ object rather than a tool.”

Discussing the characteristics of a decent espresso martini cocktail, the idea of a shaker came to Daniel Debiassi and Federico Sandri.

They elaborated on the design and worked intensively on the right feeling in order to create an object that would fit into the home and match the Collar series. The cocktail shaker consists of two parts: a tumbler and a cup.

For the coffee lover, nothing is more important than flavour. With Collar, you can be in charge of the whole process, experiment and carefully choose the ingredients. Start by grinding your favourite beans in the Collar grinder and enjoy the rich,

tempting aromas. You can easily adjust the grind setting to your brewing method and preference. The espresso maker uses steam pressure to brew an espresso that is both intense and well-rounded. Top up with hot milk, if you like.

Stelton is a Danish design company with strong roots in the Scandinavian design tradition. The functional and contemporary designs of Daniel Debiassi and Federico Sandri combined with Stelton's stringent, minimalist DNA have proven to be the perfect match for a unique collection.
